CONGRATULATIONS!

Dr. Heather Boon, BScPhm, PhD
University of Toronto

Winner of the 2015 \$250,000
Dr. Rogers Prize for Excellence
in Complementary and
Alternative Medicine

DR. HEATHER BOON is Dean of the Leslie Dan Faculty of Pharmacy, University of Toronto. Her 25-year career was sparked by a recognition of the large number of Canadians using “alternative” medicine and how little research existed. She is a key player in the development of the Centre for Integrative Medicine, a joint venture between the University of Toronto and the Scarborough Hospital. She was a driving force behind the establishment of the IN-CAM network and the International Society for Complementary Medicine Research. She is a leader of the highest integrity and a champion of collaboration across disciplines.

For more information on Dr. Boon’s achievements, please visit DrRogersPrize.org.

The purpose of the Dr. Rogers Prize is to highlight the important contributions of Complementary and Alternative Medicine (CAM) to health care by recognizing and celebrating the pioneers who have made significant contributions to the field. The Dr. Rogers Prize was created in 2007 and is sponsored by the Lotte and John Hecht Memorial Foundation, Vancouver, BC.

CAM Practitioner: Where alternative meets mainstream.

There are nearly 4 million articles in PubMed that respond to the search *medical*. But when you narrow it to *complementary medicine* the number of hits drops to just over 200,000. But even 200,000 are a lot of articles to sift through. **CAM Practitioner** is a new site to help target the most recent and most heavily researched topics within PubMed. **CAM Practitioner** is a valuable resource you can use to access leading research to guide your practice.

According to the *National Institute of Health*, more than 30 percent of adults and about 12 percent of children use health care approaches developed outside of mainstream Western, or conventional, medicine.

A recent survey found that the use of dietary supplements is the most popular complementary health approach.

The most frequently cited reasons for CAM use are general wellness, and pain management.
